WELCOMING ADDRESS

Dear Colleagues,

On behalf of the Organizing Committee it is a great pleasure to invite you to the **6th Mediterranean Experts Meeting on “Vitamin D, in the prevention of health disparities during adult life”**, in Thessaloniki. What started in 2017 in Thessaloniki as an idea between friends, became a friendly exchange of scientific ideas in the following meetings, travelling from Thessaloniki to Abu-Dhabi and back in Rome and has been evolving to a prestigious scientific event, due to the contribution of all the distinguished members of the scientific committee.

The years of Covid 19 pandemic have added scientific knowledge to our belief that vitamin D actions extend well beyond its established musculoskeletal role. Moreover, the “Mediterranean Paradox” of vitamin D deficiency prevalent in a large part of the population in countries with ambient sunshine makes the collaboration among scientists of these countries necessary. We need to join forces to understand the magnitude of the problem and the magnitude of the disorders that may relate to this problem.

At the same time, we must contemplate on the need for evidence-based guidelines for Vitamin D measurement and supplementation and it is a great pleasure that we will hear the latest on the Current American Endocrine Society Guidelines by Professor Anastasios Pittas, who is the vice president of the Vitamin D guidelines committee.

This year we invite once again in Thessaloniki everybody who wants to contribute to Vitamin D research to share with us ideas and enthusiasm. Thessaloniki is the perfect host city. It is a seductive metropolitan city that over the centuries has been the crossroads of different people and ideas.

Join us in October and let us introduce you to the Mediterranean spirit and the Greek hospitality!
